

## Ten Great Reasons why you should choose FileNexus\* as your Document Management/ Data Archival / Digital Filing System

1. **IT HANDLES JUST ABOUT ANYTHING FROM ANYWHERE** – FileNexus can index, collate, archive and handle virtually any data type (images, text, laser print files, PC files, emails, faxes – you name it), from any source (host systems, PC's, scanners, photocopiers, etc.), via any connection (LAN, WAN, Internet).
2. **YOU CAN START SMALL AND GO REALLY, REALLY BIG** – FileNexus is a fully modular system that is completely at home in small departmental applications – with the power to handle literally billions of records with virtually no effect on performance.
3. **IT'S A "REAL WORLD" APPLICATION** – that means it's up and running fast (nearly always in less than 5 days), it's easy to learn for the user (about 10 minutes), consumes very little IT time to administer (maybe 30 minutes a week), and can utilize storage/back up devices you probably already have in place. It also means that FileNexus has the flexibility to work the way you do now, right out of the box – with lot's of power to get as sophisticated as you want, when you want, with an absolute minimum of fuss.
4. **IT'S A TRUE ARCHIVAL SYSTEM** – A lot of systems out there allow someone to amend a record after it's stored (so you better not throw out those filing cabinets quite yet). While we're happy to give a live working copy of a record anytime you want, once a record is stored to FileNexus, it cannot be altered or amended – even by a system administrator. Any notes and markups are done as "overlays" and are always stored separately from the original file. All document versions are stored, dated and fully recoverable.
5. **GREAT SECURITY EQUALS GREAT PRIVACY** – FileNexus has highly advanced, easy to administer, security features that keep documents away from prying eyes. Even if you're allowed to see something, how much you can see and what you can and cannot do with it is fully configurable in FileNexus. Our advanced logging features track who looked at what, when and is exportable in report form or as a file.
6. **DATA INTEGRITY** – FileNexus allows you to export all of your stored data in either its original file format (for things like text data, PC generated files etc.) or in industry standard format such as TIF (for scanned images or laser print files etc.) – your data is never trapped in a proprietary format. If you're burning disks for Disaster Recovery, FileNexus will automatically seed the stored data with key indexes helping make all your data rapidly recoverable if disaster strikes.
7. **YOU CAN INTEGRATE IT WITH OTHER APPLICATIONS** – FileNexus has an available ActiveX integration kit that allows for 2 way integration with such things as your host applications, web servers, just about anything. It's easy to create and customize large integrated applications with FileNexus as your data hub.

8. **WE'VE GOT A LOT OF GOOD NAMES BEHIND US** – FileNexus is used in a broad range of industries such as Banking, Manufacturing, Retail, Securities, Food, Healthcare, Utilities etc. by organizations big and small, who are serious about results and who do their homework before they buy.
9. **WE'VE BEEN IN THE BUSINESS FOR A WHILE** – Incorporated in 1980, **Loris Technologies Inc.** is a leading innovator in the programming, development and on-site application of our own digital storage and document management technologies – it's what we do! Our innovative technologies, no-nonsense business approach and superb client support has earned us the business of representative organizations who employ over 800,000 people, generate in excess of \$300 billion in annual revenues and control over \$1 trillion dollars in assets worldwide.
10. **OH, AND YOU CAN ACTUALLY AFFORD FILENEXUS** – Many of our larger clients started with small departmental systems involving only a few users. FileNexus is modular and sensibly priced – no hidden fees or charges, you know the price all in and to the penny. The average total system payback, out of hard operating costs alone (i.e. such as paper, microfilm, storage etc.), is generally less than a year. What's more, we can often tailor a month by month, zero interest payment plan direct from Loris Technologies Inc., that allows you to pay for the system entirely out of savings, *quit anytime you want with no penalty or contract termination fees* and apply everything you give us over a predetermined time (usually 12 months) toward the purchase of an irrevocable license. Who needs a budget?
